

ASA MTS (INTERNATIONAL) CANDIDATE REPORT REVIEW CHECKLIST

(Basic Report Requirements and General Report Quality)

INSTRUCTIONS

This checklist offers convenient criteria to help Candidates evaluate the MTS appraisal report they submit to the Board of Examiners as part of the ASA advancement procedure. The Examiners will use a similar checklist to review the Candidate's report work product. This checklist provides reasonable guidelines as to the standard elements that should be included in an acceptable appraisal report.

In order to successfully meet the report review criteria, one (1) comprehensive appraisal report must be submitted. *Candidates whose employer's policy prohibits writing/submitting a complete, narrative appraisal report may submit a report that is based on an actual appraisal assignment.* This "demonstration" report must be so identified and should include an explanation as to which portions of the submitted report differ from what was received by the client and why. A demonstration report must meet the same requirements of an actual report.

Not all components on the checklist to follow are required or appropriate for every appraisal report. This checklist is applicable **only** to the ASA advancement process and is **not** intended to be used for any other purpose. For purposes of demonstrating appraisal expertise, Candidates should select appraisals that address as many items on this checklist as possible. If an item is applicable to a report but not included (such as a Jurisdictional Exception), the Candidate should submit a detailed explanation under separate cover.

The optional commentary section at the end of the checklist provides the Candidate a place to include important additional information pertaining to the submitted report, which would assist the Examiners in their review.

This checklist was developed in accordance with the **International Valuation Standards (IVS)**. The items in the brackets reference the corresponding subsections within the IVS. For ASA accreditation purposes, any report that fails to address these items will be immediately rejected regardless of the quality of the rest of the report.

MTS REPORT REVIEW CHECKLIST

(for reports using IVS, not USPAP)

(Y/N)

Page#

- _____ 103.1 Communicates value conclusion to commissioning party and other intended users with enough supporting data so the Reader will have a clear understanding of the valuation provided.
