BS, Economics - Bentley University

Why do you feel you are qualified for this position? Include information on past volunteer positions with ASA and other organizations.

Having been actively involved in the equipment leasing industry for the past 34 years, I have a unique understanding of the important relationship between the appraisal and finance/equipment leasing professions. While very similar, there are critical differences in outlook and application of valuation and appraisal methods and processes. As a member of both professions, I bring the MTSC committee experience and perspective to improve overall understanding and collaboration between these disciplines which is particularly important given the symbiotic relationship they share.

What contributions have you provided ASA as a member or to a comparable organization(s)?

I have served as an active member of ASA's MTSC committee since 2022 and the ELFA's Equipment Management Committee since 2000 and have worked with each to develop a better understanding of the needs and outlooks of the appraisal and finance/equipment leasing communities.

What do you wish for ASA's members?

ASA's members provide a tremendous value to all industries they serve but particularly the finance and equipment leasing. My wish is to help ASA and its members better understand these industries, their relative value and improve their value proposition to develop new relationships and expand existing ones.

What do you wish for ASA in the profession?

ASA is a great organization providing critical training and accreditation paths. These foster and improve credibility and trust. My wish for ASA is to continue to build on its past successes in these areas, expand awareness of their value and help broadens its overall reach.

Why should members vote for you?

Simply, my work experience has always straddled the appraisal and finance industries which provides a unique insider perspective for both disciplines. My goal is to continue to represent these perspectives and members of both groups as the committee pursues high value programming for its members.
