**Campaign Statement**

My goal is for the RP discipline to thrive in education, legislation, and recognition. Education & Recognition are simple staple needed to benefit our membership. Education topics and availability certainly have been addressed, but need continued development. Recognition has proven difficult and limited, but to benefit our members it is necessary to be more aggressive and creative. Legislation should be recognized as a key to our future that needs incredible attention. Our past tends to take a defensive stance. My hope is that we can anticipate and make our stance more offensive. Any strategies and responses should be more direct and aggressive rather than passive.
